

THE OLIVER SMITH FARM AT SMITH VOCATIONAL & AGRICULTURAL HIGH SCHOOL

Annual Replacement Dairy Heifer Sale

Cattle Selling:
October 21, 2025

Northampton Cooperative Auction
Whately, MA

2025 SVAHS Dairy Heifer Replacement Sale

The Junior Class of Animal Science students at Smith Vocational and Agricultural High School is proud to present this year's offering of dairy heifers. Each heifer in this catalog represents years of dedication, learning, and hands-on experience.

Beginning their freshman year, every student has been assigned a calf to raise and manage. Students are responsible for all aspects of their heifers' care, including health management, vaccinations, record keeping, weight and height tracking, breeding and mating decisions, and daily feeding and husbandry. This project serves as the culmination of their dairy project.

The proceeds from this sale directly support the Animal Science program and its students, helping us continue to provide meaningful, career-focused agricultural education.

We sincerely thank our buyers and supporters for investing in our program and our students who are the next generation of animal science professionals!

Thank you for your support, and enjoy the sale!

Sincerely,

The 2027 Animal Science Class & The Animal Science Department at
SVAHS

BROWN SWISS

Idaho is a 2 year old **registered** Brown Swiss Heifer bred to Motown. When looking at the linear traits of her sire and grandsire she is predicted to have a strong fore udder attachment, a wide rear udder, and overall an above average udder.

BROWN SWISS

Kansas is a **registered** two-year-old, brown Swiss heifer. I admire her foot handle and her overall dairy strength. However, she lacks dairy form and is posty in her hind legs. When looking at her linear traits of her sire and her grandsire, you will notice that she should have a closer front teat placement, and she will have a strong fore udder attachment. You will see that she will have a shorter-than-average teat length.

HOLSTEIN

Minx was born on October 9th, 2023. I like Minx's extremely steep foot angle which is at a +3. Her stature is around average which is good since she won't be too tall or too short. Her being long and dairy is something I like about her. I would like to improve her strength because she is too narrow and frail at the moment. Also her body depth is extremely shallow and her dairy form is tight instead of being more open. The sire's milk production is +724 pounds. The sire's fat production is +65 pounds. The sire's protein production is +28 pounds. The PTA type is +0.78 and the sire's TPI is +2704.

HOLSTEIN

Nellie is a 2 year old holstein heifer. She has a very nice foot angle and has overall very good dairy form. Although she is short and her back feet are pointing outwards she has potential to improve her linear traits. Nellie is a strong dairy heifer with a good future in the milking industry. Based on her sires' linear traits she will grow to have a deep udder with a strong fore udder attachment and wide rear udder width.

Sire

HOLSTEIN

Overall, my dairy heifer has a gentle and kind disposition with a great rump width and has a very strong, depthful body, perfect for birthing.

HOLSTEIN

Darla is a 2-year-old black and white Holstein heifer born on September 5, 2023. Her high rear leg score will impress you, as will her slightly above-average height, which is expected to pass on to her calf. Her body condition score, and her wide rump width. She should have great udders in all categories based on her Sire and maternal grandsire's linear traits. Her sire Wallen is +1,392 in Milk, which is exceptional, +94 in pounds of fat, and +69 in pounds of protein. His GTPI is +2874, and his PTA for type is +1.47. Her maternal grandsire Duluth is +172 in Milk, +30 in fat, and +19 in protein production. She is expected to be a productive milking cow, and her calf will inherit this trait. As well as many of her other excellent production traits.

HOLSTEIN

Munchkin was born October 13th, 2023. She is feisty and sweet. She has a good rump angle and her pins are level. I would change Munchies fertility index, and her mastitis index. I would keep everything else. What are the sire's PTAs for all production traits? Milk +1637, Fat +91, Protein +68. What is the sire's PTA for type? +0.74. What is the sire's TPI? +2797.
